Safe Routes to Schools is a project of
Transportation Authority of Marin

BIKE COMMUTE 101

This hour long class, offered to 9th grade students, examines the changing role of bicycles in our society and prepares students to join the growing green transportation movement. Our engaging presentation includes the health and environmental benefits of cycling, a guide to successful riding, and fresh insight into traffic laws. Students are challenged to imagine and draw their communities using bicycle transportation. At the end of the class, students set a personal goal for biking and organize riding groups.
