Holly Bogin:
Holly@marinbike.org

My Public Transportation System

My Public Transportation System provides students an opportunity to safely grow in their independence and self reliance by learning how to efficiently use another form of Green Transportation - the BUS. In one class, students will learn the benefits of taking the bus, and the knowledge necessary to become skilled and confident in using public transportation. Upon request, Transportation of Marin (TAM) will provide a bus on campus for hands-on learning, including how to load on and off a bike.
