

# CORRIDOR DESIGN

## Median Islands

- 6' minimum width for refuge, 8' or larger recommended to accommodate bicyclists, higher pedestrian volumes
- Consider fire department requirements
  - Often 20' clear to pass stopped vehicles
  - Wider for hook & ladder trucks
- 5' minimum opening for ADA, width of crosswalk recommended
- At roadway grade, with detectable surface
- Place signs, beacons both right-side and in median

Median does not provide refuge

## Shared-use Paths

Path with shoulder

Delineated separation

### Shared-use paths

- Must meet ADA requirements
- Minimum 8' wide, recommended 10' or wider depending on volume
- Unpaved shoulders can provide additional space for pedestrians
- Dashed yellow centerline recommended

### Separated paths

- Striping or physical
- Consider compliance issues
- Minimum 8' wide for two-way bicycles, 5' for pedestrians
